WOSM AFRICA - UNICEF ESARO PARTNERSHIP REPORT

2020 - 2021

INTRODUCTION

The history of collaboration between UNICEF and the SCOUTS movement globally and within Africa dates back many years ago and has been on various topics. It is on the strength of this history that the UNICEF East and Southern Africa Regional Office (UNICEF-ESARO) and the World Organization of the SCOUT Movement (WOSM Africa) entered into an initial twelve months Small Scale Funding Agreement from 1st March 2020. Considering the challenges brought about by the COVID-19 pandemic, a no-cost extension was granted up to 30th June 2021. Considering the programmatic shifts agreed to adapt to the COVID-19 situation, a second no-cost extension was issued until December 2021.

With a focus on innovative, data-driven adolescent and youth engagement on climate change awareness and mitigation, promotion of adolescent nutrition and other programme priorities in East and Southern Africa, the partnership addressed the following three main areas:

- Adolescent engagement for climate change mitigation and awareness
- Engagement and behaviour change around adolescent nutrition
- Adapting and promoting UNICEF's innovative platforms for learning, information sharing and engaging adolescents on programme priorities.

The activities initially planned during the SSFA conception phase and to be implemented under these priority areas included:

a) Adolescent engaged for climate change mitigation and awareness:

- Provide technical and financial assistance to access the Cartedo Platform, customise the Plastic Waste Reduction and train the WOSM Africa to use the platform.
- Provide technical assistance to the national Scouts movements to submit the locally co-created solutions to the Plastic Waster Reduction Challenge through the Cartedo platform.
- Provide seeds funding to the three most promising solutions for prototyping and testing at community level.
- Organise a workshop at the Jamboree for presenting the tested solutions and identify opportunities for scale-up.

b) Capacity of youth advocates strengthened for advocacy on adolescent and early childhood nutrition:

- Awareness creation on the nutrition for adolescents and young people at the April 2020 online Special Edition of the Jamboree.
- Conduct Training of Trainers on adolescent and early childhood nutrition advocacy toolkit and regional action framework with select ESAR countries.
- Adaptation and roll out of nutrition advocacy toolkit on youth, adolescent and early childhood nutrition into the Food for Life proficiency programme in select ESAR countries.

c) UNICEF's innovative platforms adapted and promoted for learning, information sharing and engaging adolescents on programme priorities:

- Adaptation of the Scouts-UNEP Climate Change Awareness Learning curriculum into a dedicated IoGT Scout page, through a co-creation and participatory process with Scouts' representatives and adolescents from selected countries.
- Organise a mini-workshop to customise UReport partners-page and Rapid Pro for the needs of the scouts and conduct advocacy with UNICEF COs and Scouts national movements for the joint promotion and use of UReport and IoGT in selected ESAR countries, co-design regional UReport polls.
- Documentation of success stories around innovation and adolescent engagement.

Through this work, it was expected that the country collaboration between UNICEF Country Offices "UNICEF COs" and National Scout Organizations "NSOs" would have been enhanced, as well as the capacities of the country teams to use evidence based communication for development strategies to empower communities, adolescents and civil societies and create demand for high impact interventions in both development and humanitarian settings. This would be achieved through delivering joint partnership programme activities at a regional level while actively reaching out to the countries to facilitate local level collaborations between UNICEF COs and NSOs.

KEY RESULTS

In line with the expected outcomes, below is a summary of the achievements made to date under each priority area:

(a) Adolescent engaged for climate change mitigation and awareness.

Support was provided to WOSM Africa to customize and deliver the Plastic Tide Turners challenge via the Cartedo platform. Over 2,800 submissions were received from 14 countries and the top solutions identified. In Burundi, however, UNICEF and the SCOUTS were able to identify and support the top three participants from their country. The 8th Africa Scout Jamboree initially planned for August 2020 has also been postponed due to COVID-19 the presentation of the solutions was withheld until the new dates for the event will have been determined.

(b) Capacity of youth advocates strengthened for advocacy on adolescent and early childhood nutrition

Over 450 Scouts were sensitized in the May 2020 jamboree that on the potential impacts of COVID-19 on Nutrition, key tips on healthy eating while preventing the spread of COVID-19, and the importance of youth advocates and suggested actions for youth-advocates. Further, an adolescents and childhood nutrition Training of Trainers capacity building workshop was conducted and attended by 25 young people and 11 adult leaders from 12 countries in Eastern and Southern Africa. A follow-up e-learning course and an advocacy document are under development. A survey to identify key nutritional issues among adolescents and youth was also conducted. The integration of the adolescent and early childhood nutrition advocacy toolkit into the Scouts Food for Life project has been planned for the second no-cost extension of the existing partnership.

(c) UNICEF's innovative platforms adapted and promoted for learning, information sharing and engaging adolescents on programme priorities

The adaptation of the SCOUTS Plastic Tide Turners programme content into a dedicated page on UNICEF's Internet of Good Things was done and the content also translated into Portuguese. The workshop to discuss customization of UReport among Scouts was held and subsequent support to given countries that led to the formalization of national-level partnerships between three UNICEF Country offices and National Scout Organizations in Burundi, Kenya and Namibia.

In addition, several additional activities, described in more details below, were organized in collaboration with UNICEF ESARO, at no-costs:

- Organisation and delivery of four sessions at the April and November sessions of the 2020 Scouts global Jamboree on the Internet (JOTI) on:
 - Co-ideation of youth engagement mechanisms to prevent COVID-19, in collaboration with Shujaaz
 - Promotion of UReport (2 sessions)
- Mobilisation of young people from the Scouts network to participate to the COVID-19 Youth Challenge
- Mobilisation of young people from the Scouts network to participate to the Better together Africa programme, organized by Goodwall, Yoma Africa, UNICEF ESARO and other partners, aimed to offer skills building opportunities to adolescents and young people in Africa.

This report documents the success stories around innovation and adolescent engagement realized through this partnership at both regional and national levels. Below you will find some examples illustrating what partners have achieved over the first year of the partnership.

REGIONAL CASE STUDIES

Workshop on Youth Agency Market Place

The two-day workshop hosted by RLabs and initiated by Johannes Wedenig, UNICEF Senior Manager and Convenor of the African Youth Digital Innovation Instrument took place from 13-14 February 2020 in Cape Town, South Africa. It brought together a group of collaborators from highly complementary and strategically aligned organisations to flesh out a marketplace based on the current challenge statement – Accelerating speed to Piloting. WOSM Africa was represented by its Information and Communications Technology Officer, Morris Mwendwa. A detailed report of the workshop is attached.

Special JOTI Edition

Between 3-5 April 2020, just after the global spread of the COVID-19 pandemic WOSM organized a special edition of its annual virtual event Jamboree-On-The-Internet (JOTI) to provide an alternative engagement opportunity for the young people who were confined at home following closure of schools as result of the pandemic. In this global online meeting, ESARO supported the Scouts to roll out four sessions:

- Awareness creation on the nutrition for adolescents and young people.
- UReport and the COVID response, in collaboration with UNICEF HQ.
- Creative communication for development material development for and by adolescents, in partnership with Shujaz Inc.
- Group discussion to gather ideas from adolescents on how to cope with physical distancing and overall prevention recommended behaviours.

PSEA Assessment

Upon signing the Small-Scale Funding Agreement, the World Organization of the Scout Movement Africa Regional Office (WOSM Africa) underwent, through March 2020, a Preventing Sexual Exploitation and Abuse (PSEA) Assessment by UNICEF. The purpose of the exercise was to evaluate the policies systems and procedures for preventing and dealing with incidences of sexual exploitation and abuse in the work of the movement. The rating for the WOSM Africa was noted as Moderate, which means its PSEA organizational capacities need improvement and SEA risks are moderate.

The exercise yielded outcomes of the review and highlights of our specific outstanding questions and missing materials for each core standard, where relevant. It also provided guidance on where WOSM Africa could find more information and guidance related to each core standard along with some recommendations discussed during the assessment. As a result, an action plan was developed to progressively address organizational gaps on PSEA in order to achieve a low SEA risk rating. A review of the action plan is yet to be done to update the risk rating. A detailed report of the assessment is attached.

COVID-19 Youth Online Design Challenge

Between April and June 2020, the SCOUTS were part of the Steering Group for Africa COVID-19 Youth design Challenge lead by UNICEF ESARO, Cartedo and other partners. Apart from contributing ideas to the development of the challenge, support was provided in promoting the challenge and activating the participation of National Scout Organizations across the region.

Scouts on Internet of Good Things

With support from the UNICEF team, the SCOUTS Plastic Tide Turners Curriculum was adapted for the Internet of Good Things platform and can be accessed at: <https://rke-iogt.unicef.io/sections/scouts/tide-turners-plastic-challenge>. Following a request from Mozambique, the content was also translated offline into Portuguese.

JOTA-JOTI 2020 Session

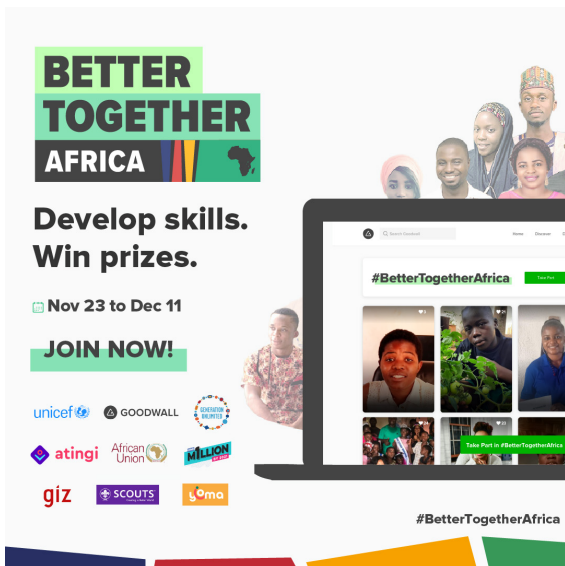

At the 2020 Scouts Jamboree-On-The-Air/ Jamboree-On-The-Internet (JOTA-JOTI) event, held in November 2020, UNICEF delivered a session titled "Engaging adolescent and young people through UReport, particularly in the COVID-19 response" which was accessible to young people worldwide. The session showcased UReport as a tool through which Scouts can get access to lifesaving and wellbeing content and use it to practice life-skills to engage in different programme priorities, including on COVID-19. It highlighted ways Scouts could engage in UReport by:

- Registering themselves as UReporters, or interacting with the different UReport Chatbots to receive critical information and provide feedback;
- Promoting the use of UReport to other adolescents and youth;
- Conducting community services on the basis of information and suggestions for safe engagement received via UReport.

It was also noted that Scouts could also play an active role in the management of the platform at country level by:

- Engaging in the steering committee of UReport;
- Engaging as U-Ambassadors or U-Partners;
- Collaborating through the U-Partners platform.

Better Together Programme

SCOUTS were actively involved in the planning and delivery of the Better Together and Better Together Africa programmes. The Scouts linked up with Goodwall on the Better Together Programme. Among other activities, we managed the following:

- Published the launch press release on our website (<https://www.scout.org/goodwall-better-together-programme>)
- Promoted the programme on Social media channels inviting Scouts to participate
- Invited Goodwall to deliver a presentation at a regional webinar for Scouts on international youth day (watch recording from minute 00:28:10 – https://worldscouting.zoom.us/rec/play/Z20QtiMnIYMY5BpW-ZsiqnDMnpNeiMVqBDZgdMpFWorh14_2A2MzLZFmvIo-WACNVxuDOWAZ8Vt3kyqPhy.-qAjhZ-pD_6zJ76d)

The programme generated a good feeling among the Scouts with many saying it came at a good time to help keep them meaningfully engaged as they learned new skills and gained new experiences. A detailed report of the challenge is attached.

Plastic Tide Turners Digital Challenge

Between October and December 2020, WOSM Africa Region with support from UNICEF ESARO and in partnership with Cartedo run a six-weeks Plastic Tide Turners Digital Challenge as part of the Scouting at Home COVID response programmes to help young people aged 14 years and above to understand the impact that humans have in the world when it comes to plastic use and consumption and how they can promote a clean, healthy planet that will contribute to a more sustainable world.

Over 2,800 young people from 14 countries took part in the challenge generating more than 5,300 ideas with a 68% completion rate. A detailed report of the challenge is attached.

Regional UReport Workshop

On 18th February 2021, UNICEF ESARO and WOSM Africa convened a virtual UReport workshop that brought together 35 UNICEF staff and 38 representatives of National Scout Organizations to discuss ways of maximizing the use of UReport to drive adolescents’ engagement and social change through the collaborations between the Scouts and UNICEF in Eastern and Southern Africa. The workshop refreshed NSOs’ understanding of the UReport platform and offered an overview of the 2016-2017 UReport Global Coordination project between WOSM and UNICEF. It also showcased case studies of previous and current UNICEF-SCOUTS collaborations on U-Report and explored opportunities for future collaboration between NSOs and UNICEF Country Offices on maximising U-Report for SCOUTS.

As a result of the workshop, a number of experiences, opportunities, limitations and support needs were identified and shared with both UNICEF and SCOUTS to support discussions on how best make use of U-Report within national contexts. A document containing the outcomes of the discussions at the workshop is attached. As a direct result of the workshop, a country collaboration between the Namibia UNICEF CO and the NSA in that country has been formalized through a signed Memorandum of Understanding to jointly promote the platform. The Namibia NSO also participated at a U-Report training organized by ESARO and the UNICEF Namibia CO with different other partners on 29 April 2021. The launch of the platform in Namibia is expected to be held in the second half of 2021.

Adolescent and Youth Nutrition Engagement

Between March and May 2021, a series of interventions around adolescents and youth nutrition have been implemented. A capacity strengthening workshop was conducted on 30th April 2021 and attended by 36 Scouts from 12 countries. This was preceded by an online survey that returned 99 responses of different issues relating to food security and food consumption among adolescents and young people which formed a background for the workshop. As a follow-up, an e-learning course is under development to support with scaling up contents of the workshop to a wider Scouting audience across Africa and beyond. From this training the young people and their adult leaders were empowered to become advocates for healthy nutrition among adolescents and youth in their countries. A report of the workshop and the survey as a well as an outline of the e-learning course are attached.

NATIONAL CASE STUDIES

The regional partnership between the SCOUTS and UNICEF in the East and Southern Africa Regional Office (ESARO) has catalyzed a series of national engagements between the National Scout Organizations and UNICEF Country Offices in the region– some formally while many more informally.

To date there have been formal partnerships in Burundi, Kenya, Namibia, Tanzania and Mozambique. Through informal collaborations, the two organizations have also continued to engage closely on different programmatic agendas in Botswana, Ethiopia, Malawi, Madagascar, South Africa, Uganda and Zambia.

The impact has also trickled beyond ESAR and inspired engagements in the West and Central Africa with Benin and Ghana having entered into formal partnerships and informal collaborations ongoing in the Gambia, Cote d'Ivoire and Niger among others.

Below are some highlights from a few of the countries:

Burundi

In 2020, the National Scout Association in Burundi played an important role in the introduction of innovative online platforms in UNICEF Burundi's adolescents and young people skills building programme. In June 2020, the NSA joined other partners to conduct community outreach to ensure that Burundian adolescents would join the COVID-19 Cartedo Challenge. Some 1,722 adolescents (50% girls) joined the challenge. Burundi recorded the highest completion rate with 670 solutions submitted by adolescents. UNICEF provided seed grants to the top five solutions and the Scouts are ensuring the coaching of three of the winners. With the success of the campaign, a first SSFA was signed in November 2020 to implement a national campaign to support the "Reimagine the Future" challenge. More than 4,000 adolescents and young people (boys and girls) registered to the challenge. They acquired new portable skills that will equip them to prepare for their future. Again, Burundi recorded the top three best youth/adolescent mobilization thanks to the Scout strong community presence.

An additional Partnership Agreement was signed in March 2021 to strengthen adolescent participation in UNICEF programme design and monitoring while reinforcing their preparedness to emergency. The partnership covers four aspects of the UNICEF programme:

- Support the roll out of UNICEF innovative integrated M&E system. As such the NSA will lead series of data collections in various province of Burundi. Data collected through the ONA system will ensure that adolescent's views are informing the overall skills agenda program design and implementation.
- Scouts will spearhead the introduction of various online learning programs in Burundi. Through the the deployment of 1,000 tablets to adolescent groups in 10 provinces of Burundi, the Scouts will provide in person coaching to adolescent leaders to navigate across various platform and build their capacities in managing the tablets and contents. The Scouts will also provide coaching to the three winners from the 2019 Cartedo Challenge.
- The Scouts are also the main partner in the implementation of U-Report in Burundi. They're running a country wide campaign for registration with an aim to register 90,000 new adolescent and youth by the end of 2021. They will also set up U-Report clubs to engage adolescents/youth in identifying issues they would like to address through U-Report, while debating poll's outcomes and working together to find solutions to address any community needs identified during the consultations.
- Key Staff within the organisation will also receive training on Risk Communication and Community Engagement (RCCE). The objective is to have skilled Scouts relay in the 18 provinces who can be deployed in context of emergency and who can deliver timely life-saving messages to the community.

Poster for Burundi "Reimagine your Future" Campaign

"Reimagine your Future" Campaign in Lycee Communal Ijenda – Bujumbura Rural – Burundi

To date the NSA in Burundi have engaged in training 18 adolescents as national U-Report leaders who have gone on to conduct 10 other trainings for their peers in their own communities. They have also organized radio broadcasts to discuss results of U-Report polls and helped to support the development of three project prototypes of 3 young people into a finished product. This has been positioned through the good relationship with the UNICEF CO, the determination of the adolescents to learn as well as the overall impact of our activity among communities of young people. The Scouts are also supporting the Skills4Girls program of UNICEF by providing facilitators to lead workshops and leadership camps.

"U-Report was a big opportunity for Burundi Scouts Association to train young people in order to be active in the development of their communities and was an occasion to identify the challenges in communities and participate to discover solutions with the youth participation" says Jean-Marie Niyomwungere, National Executive Coordinator of the Association des Scouts du Burundi.

Namibia

On 21st April 2021 UNICEF Namibia and Scouts of Namibia signed twelve-months MoU to formalize partnership between two organizations to jointly operationalize the U-Report project in Namibia, together with other key stakeholders from Government, the United Nations in Namibia, civil society and other youth groups. The partnership aims at contributing to the establishment of, and gradual scaling-up, of UReport in the country.

The collaboration is expected to close the gap in perception data on COVID-19 secondary impacts on key affected populations in Namibia, establish mechanisms for influencing policymaking of government at different levels (national and regional) and programming of UNICEF and its partners, using UNICEF Namibia's position as a key advocate for children, and position U-Report as a real-time channel for social and behavioural change communication.

So far, the following have been achieved since the collaboration began:

- Initial U-Report collaboration meeting was held on 10/03/2021
- Appointment of national U-Report Coordinator for Scouts of Namibia.
- Virtual U-Report Induction/Partners Training conducted on 23/04/2021.
- As a result of the partners training, the newly formed Namibian Partnership Solutions wishes to engage with Scouts of Namibia to collaborate on projects of mutual interest.

Kenya

At the start of 2021, UNICEF Kenya and the Kenya Scouts Association signed a one-year letter of commitment to support the roll out of U-Report in the country under the name YUNITOK Kenya. This is aimed at expanding education, skills development, employment, and engagement opportunities for young people with the goal of amplifying their voices on issues affecting them through the YUNITOK Platform.

The partnership has three strategic objectives:

- Scale of U-Report: Membership growth through creating awareness on Yunitok targeting one million Scouts in 3 years.
- Engagement: Conducting young people’s engagement on Yunitok through information sharing and polls.
- Change: Conducting community service activities to reach out to communities.

To achieve these objectives the following activities are being implemented:

- Acquisition of the SMS short code, WhatsApp number and Facebook account for registration.
- Ongoing registration of Scouts on the YUNITOK platform
- Online sensitization webinars on the YUNITOK Kenya
- Community service at Chelate Primary School to mark the National mental health awareness week in collaboration with the government Ministry of ICT, Innovation and Youth Affairs.
- Conducted a Youth Entrepreneurship training for 40 Rovers Scouts who have come up with business plans and other community engagement activities like advocacy for blood donation.

Kenya Scouts Yunitok Champions during a mental health awareness activation during the mental health awareness week event at the Two Rivers mall in Nairobi.

U-Report Kenya (Yunitok Kenya) promotional poster

Zambia

In Zambia, no formal partnership exists between UNICEF Zambia and the Zambia Scouts Association but that hasn't stopped collaboration from taking place. On the strength of the regional partnership, the Scouts have continued to take part in different initiatives while still pursuing possibilities of discussing a national partnership, among them UNICEF/Cartedo COVID-19 Youth Design Challenge, Plastic Tide Turners Cartedo Challenge, U-Report, adolescent nutrition programming, among others.

Aside from these, through their own initiatives they've also continued to engage in programmes on ending early child marriages, sensitization against gender-based violence, campaigning against drug and substance abuse, climate change awareness and action, child and online safety training, and mobilizing young to take in community and national development activities. These are activities they are looking at scaling up with support from different stakeholders.

LESSONS LEARNED AND CONCLUSIONS

Though some of these partnerships are still in their infancy a couple of challenges have been noted particularly with regards to the implementation of the UReport collaboration, many of which are contained in the UReport workshop report, among them being the limited access to mobile phones of some Scouts members and their peers at community level to take part in UReport activities.

Additionally, resource mobilization is a major challenge affecting the implementation of these activities. Also considering the growing interest among National Scout Organizations, there is need to further support formalization of specific partnerships at national level. This would require a lot more support so that partnerships best fit and support the activities of the National Scout Organizations.

While most of the partnerships formed so far have been on U-Report, NSOs have identified other areas for possible collaboration with UNICEF and other UN agencies e.g. expanding the Scouting in Schools programme, Food for Life gardening, ethical leadership and youth entrepreneurship, etc.

The involvement of young people so far indicates that engagement of adolescents in digital engagement programmes is an interesting way for them to learn and take part in finding solutions for local challenges. It has also shown that adults too can learn a lot from the experiences of young people.

Overall the partnership has been a great catalyst for youth engagement particularly during the COVID-19 pandemic that affected youth participation and brought about numerous other challenges. Thanks to these collaborations and the utilization of technology, more young people have gotten opportunities they would otherwise not have had to interact, learn and contribute to finding solutions to both personal and community challenges in difficult times.

As the partnership enters in a new phase, these experiences and lessons at regional and national levels will offer insights into ways of strengthening and re-inventing the collaboration for even greater impact and outreach.
